H. R. 1252

To amend the Safe Drinking Water Act to change the drinking water standard for arsenic from 50 parts per billion to 10 parts per billion by fiscal year 2003 and to 3 parts per billion by fiscal year 2006 and to authorize an \$800 million to provide grants to small public drinking water systems to assist them in meeting these standards.

IN THE HOUSE OF REPRESENTATIVES

March 28, 2001

Mr. Sanders (for himself, Mr. Bonior, Ms. Lee, Mr. Abercrombie, Mr. George Miller of California, Mr. Kucinich, Ms. Mckinney, Mr. Payne, Mr. Pallone, Mr. Sherman, Ms. Delauro, Mr. Towns, Mr. Hoeffel, and Ms. Norton) introduced the following bill; which was referred to the Committee on Energy and Commerce

A BILL

To amend the Safe Drinking Water Act to change the drinking water standard for arsenic from 50 parts per billion to 10 parts per billion by fiscal year 2003 and to 3 parts per billion by fiscal year 2006 and to authorize an \$800 million to provide grants to small public drinking water systems to assist them in meeting these standards.

- 1 Be it enacted by the Senate and House of Representa-
- 2 tives of the United States of America in Congress assembled,

1 SECTION 1. SHORT TITLE.

- This Act may be cited as the "Arsenic Reduction in
- 3 Drinking Water Act".

4 SEC. FINDINGS AND PURPOSE.

- 5 (a) FINDINGS.—Congress finds that:
- 6 (1) According to a 1999 study by the National 7 Academy of Sciences, arsenic in drinking water 8 causes bladder, lung and skin cancer, and may cause 9 kidney and liver cancer. The study also found that 10 arsenic harms the central and peripheral nervous 11 systems, as well as heart and blood vessels, and 12 causes serious skin problems. It also may cause 13 birth defects and reproductive problems.
 - (2) According to Environmental Protection Agency data, more than 34 million Americans drink tap water supplied by systems containing average levels of arsenic that pose unacceptable cancer risks.
 - (3) The current national standard of 50 parts per billion for arsenic in drinking water was established in 1942, before health officials knew that arsenic causes cancer.
 - (4) According to National Academy of Sciences estimates, one out of 100 people who drink water containing 50 parts per billion of arsenic will get cancer (based on drinking two liters of water per

- day over the course of a lifetime). That's an unacceptably high cancer risk.
- 3 (5) The Environmental Protection Agency, 4 which sets the arsenic standard, normally assigns 5 standards for toxins and contaminants that rep-6 resent no more than a one-in-10,000 risk factor for 7 cancer.
 - (6) The Environmental Protection Agency has determined that reducing arsenic in drinking water to 3 parts per billion is feasible.
 - (7) In 1997, Congress directed the Environmental Protection Agency to set a new arsenic standard.
 - (8) Small communities are concerned about improving drinking water quality.
 - (9) Small communities often struggle to meet water quality standards because of difficulty in securing funding.
 - (10) Small public water systems serving fewer than 10,000 people represent 94 percent of all public water systems.
 - (11) Small communities would benefit from a grant program designed to provide funding for water quality projects without a substantial matching requirement.

1	(b) Purpose.—The purpose of this Act is to—						
2	(1) establish drinking water standards for ar-						
3	senic such that—						
4	(A) all drinking water systems in the						
5	United States shall be required to reduce ar-						
6	senic in drinking water to 10 parts per billion						
7	by fiscal year 2003;						
8	(B) all drinking water systems in the						
9	United States shall be required to reduce ar-						
10	senic in drinking water to 3 parts per billion by						
11	fiscal year 2006; and						
12	(2) to provide grants to small public drinking						
13	water systems to assist them in meeting the revised						
14	standards for arsenic in drinking water.						
15	SEC. 3. LOWERING THE LEVELS OF ARSENIC IN DRINKING						
16	WATER.						
17	Section 1412(b)(12)(A) of the Safe Drinking Water						
18	Act is amended by adding the following new clauses at						
19	the end thereof:						
20	"(vii) Effective October 1, 2003, the max-						
21	imum contaminant level for arsenic shall be 10						
22	parts per billion.						
23	"(viii) Effective October 1, 2006, the max-						
24	imum contaminant level for arsenic shall be 3						
25	parts per billion.".						

1	SEC. 4.	SMALL	PUBLIC	WATER	SYSTEM	ASSISTANCE	PRO

- 2 GRAM FOR ARSENIC.
- 3 Part E of the Safe Drinking Water Act is amended
- 4 by adding the following new section at the end thereof:
- 5 "SEC. 1459. SMALL PUBLIC WATER SYSTEM ASSISTANCE
- 6 PROGRAM FOR ARSENIC.
- 7 "(a) Assistance Program.—The Administrator
- 8 shall make grants under this section to public water sys-
- 9 tems serving fewer than 10,000 people to assist such sys-
- 10 tems in meeting the drinking water standards for arsenic
- 11 that take effect October 1, 2003, and October 1, 2006.
- 12 "(b) MINIMUM STATE ALLOCATION.—The aggregate
- 13 of public water systems eligible for grants under this sec-
- 14 tion in each State shall not receive less than 1 percent
- 15 of the total nationwide appropriation for such grants in
- 16 each fiscal year in which such grants are made.
- 17 "(c) Authorization of Appropriations.—There
- 18 is authorized to be appropriated to carry out this section
- 19 \$800,000,000 for each of fiscal years 2002 through
- 20 2006.".
